TRADESHOW

RENEWABLE ENERGY & ELECTRICAL EXPO

22 **23** **24**
OCTOBER 2026

HELIPAD EXHIBITION CENTRE,
GANDHINAGAR, GUJARAT

www.voltagetradeshow.com

A Strategic Infrastructure Moment

Western India is entering a decisive infrastructure expansion phase. With rapid urban development, smart city upgrades, renewable energy integration, industrial corridor growth, and preparations for large-scale international sporting infrastructure in Ahmedabad, including developments aligned with future global events such as the **Commonwealth Games**, the demand for reliable, advanced, and sustainable power systems is accelerating.

This transformation is driving investment across:

Grid Modernization

Renewable Energy Deployment

Smart Power Management Systems

EV Charging Networks

Stadium and Public Infrastructure Electrification

Electrical Safety and Compliance

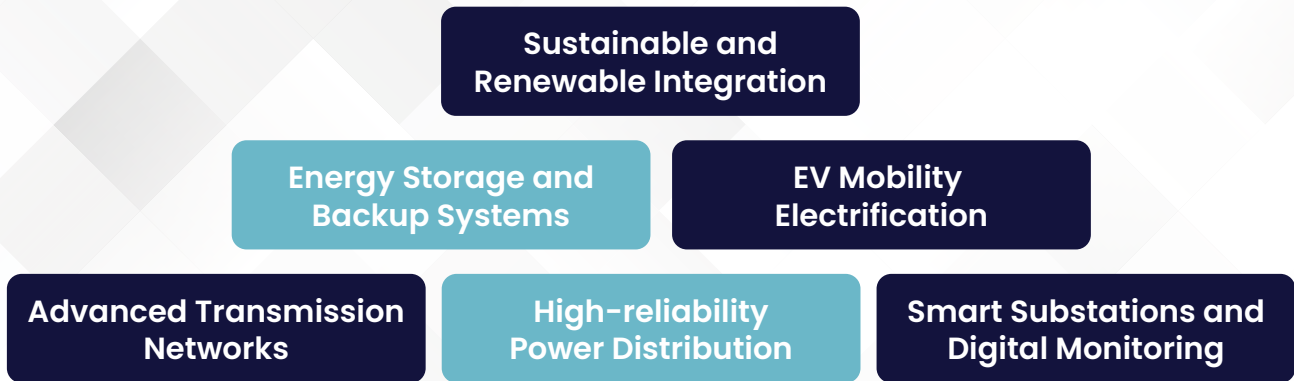

Industrial Automation

Infrastructure-Led Energy Demand

Mega-event readiness and smart infrastructure development require:

As Ahmedabad and Gujarat strengthen their global infrastructure footprint, vendor selection, technology evaluation, and procurement cycles intensify. VOLTAGE 2026 becomes a critical engagement platform during this investment window.

A Curated Corporate Environment

VOLTAGE 2026 is not a mass-market trade fair. It is a focused B2B ecosystem designed for:

The platform prioritizes strategic engagement, meaningful dialogue, and commercial opportunity.

VOLTAGE 2026

CONFERENCE

Running alongside the exhibition, the **VOLTAGE 2026** Conference will host industry leaders, policymakers, utilities, engineers, and technology providers for meaningful dialogue and knowledge sharing.

**Power Generation,
Transmission &
Distribution**

**EV Charging Stations
& Systems**

**Smart Grids and
Digital Substations**

**Energy Efficiency,
Safety & Regulatory**

**Industrial Automation
& Control Systems**

**Renewable Energy &
Energy Storage Solutions**

The conference aims to address industry challenges, emerging trends, and future technologies shaping the power and energy ecosystem.

EXHIBITOR PROFILE

- Electrical equipment & component manufacturers
- Renewable energy solution providers
- Solar system manufacturers & integrators
- Energy storage & battery technology companies
- Power transmission & distribution specialists
- Smart grid & digital infrastructure firms
- EV charging infrastructure providers
- Industrial automation & control system companies
- Electrical safety & compliance solution providers
- EPC contractors & system integrators

VISITOR PROFILE

- Power utilities & electricity boards
- Infrastructure project developers
- Industrial plant heads & facility managers
- EPC project directors
- Renewable energy developers
- Smart city planners
- Government & regulatory representatives
- Corporate procurement heads
- Consultants & engineering firms
- Institutional investors in infrastructure

FIRE, SAFETY & SECURITY TRADE SHOW

X

Voltage 2026 is co-located with FIRSST 2026 – Fire, Industrial Safety & Security Trade Show, creating a powerful combined platform for industry professionals. The co-location brings together electrical, energy, fire safety, and security sectors under one roof, ensuring wider industry reach and stronger business opportunities.

This co-location offers:

Access to a shared audience of decision-makers, consultants, contractors, and government officials

Cross-industry exposure across electrical, safety, and infrastructure sectors

High networking value with key stakeholders and buyers

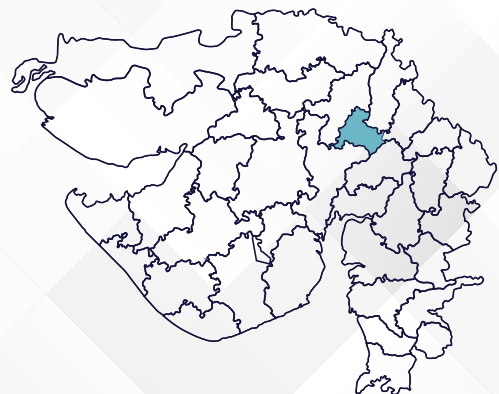

Increased visibility for exhibitors across both exhibitions

Together, Voltage 2026 and FIRSST 2026 create a focused and result-oriented platform for business growth, industry connections, and market expansion.

The Gujarat Advantage

Gujarat continues to lead in:

- Renewable Energy Capacity Growth
- Industrial Manufacturing Expansion
- Infrastructure Development
- Urban Modernization
- Smart Power Adoption

The Helipad Exhibition Centre, Gandhinagar, is strategically located within proximity to Ahmedabad's infrastructure growth zones and major industrial clusters, creating natural alignment between exhibitors and project stakeholders.
